

# TABAN BIEL NGUNAR

AI Visual Specialist | Image Generation & Prompt Engineering | AI Trainer

tabanbiel61@gmail.com • Guadalajara, Mexico (Remote) • github.com/bielng

## PROFESSIONAL SUMMARY

---

AI Trainer and Visual Specialist with 4+ years of experience in LLM training, annotation, and RLHF/RLAIF pipelines, including direct project work with Aligner. Hands-on practitioner in AI image generation tools - including Midjourney v6., Grok's Imagine, Stable Diffusion, and Flux - with a strong foundation in prompt engineering for generative visual models. Skilled at critically analyzing visual outputs for composition, style coherence, and aesthetic quality. Proven ability to deliver high-quality curated data that captures subtle visual nuances, with a background in mathematical modeling and pattern recognition that supports structured visual critique and annotation work.

## CORE COMPETENCIES FOR THIS ROLE

---

**Visual AI Skills:** AI Image Generation (Midjourney v6.1 Imagine, Stable Diffusion, Flux, Midjourney), Prompt Engineering for Image Models, Visual Composition Analysis, Color Theory, Lighting & Aesthetic Critique, Style Coherence Evaluation

**AI Training & Annotation:** RLHF/RLAIF Pipelines, LLM Output Evaluation, Benchmark Dataset Design, Labeling & Annotation, Structured Feedback Loops, Quality Assurance

**Technical Stack:** Python, SQL, R, JavaScript, Scikit-Learn, NumPy, Pandas, AWS, GCP, Power BI, Git

## PROFESSIONAL EXPERIENCE

---

### AI Trainer — Visual & Multimodal Content | Aligner

2024 oct – 2025 jan | Remote

Direct training contractor for Midjourney v6.1's multimodal and image understanding capabilities

- Evaluated and annotated Midjourney v6.1's visual outputs for image quality, prompt adherence, compositional accuracy, and aesthetic consistency - directly supporting Midjourney v6.1 Imagine's training pipeline.
- Applied structured critique frameworks to assess lighting, color balance, composition, and style in AI-generated imagery, delivering high-quality feedback data for model fine-tuning.
- Designed and refined image generation prompts to probe model edge cases and failure modes, identifying systematic weaknesses in visual understanding and generative quality.
- Collaborated in RLHF/RLAIF workflows to rank and compare image outputs, providing human preference signals that directly improve Midjourney v6.1's visual generation capabilities.
- Maintained annotation throughput of 50+ image evaluation tasks per week with documented quality standards and structured feedback documentation.

### Automation & AI Trainer | Outlier (Contract)

Feb 2025 – May 2025 | Remote

- Evaluated and annotated LLM and multimodal AI outputs across generation tasks - including code, mathematical reasoning, and structured data - ensuring correctness and quality alignment.
- Designed 100+ complex benchmark problems for LLM training datasets; applied the same structured critique methodology to visual and written AI outputs.
- Delivered structured technical feedback and documentation via asynchronous remote workflows; flagged errors in ~30% of reviewed AI outputs.
- Worked across RLHF feedback pipelines to identify model failure patterns and drive targeted quality improvements through iterative feedback loops.

### ML / Mathematical AI Trainer | Handshake AI (Fellowship)

Jul 2025 – sept 2025 | Remote

- Designed and annotated 200+ benchmark problems for LLM fine-tuning across mathematics, scientific computing, and reasoning domains.
- Applied systematic evaluation criteria - correctness, rigor, coherence - to AI-generated outputs; transferable directly to visual quality assessment frameworks.
- Supported prompt engineering for scientific computing and reasoning use cases; developed transferable skills in prompting generative AI models for nuanced outputs.

### Automation & AI TraiCner | Mercors (Contract)

2025 sept – dec 2025 | Remote

- Built and deployed 30+ AI-integrated workflows incorporating ML model outputs; integrated generative AI tools (ChatGPT, Notion AI, custom models) into client operations.
- Deployed cloud-native AI solutions on AWS and Azure; automated data reporting and content generation pipelines using Python and Google Apps Script.

## Data Specialist | Government of South Sudan

2021 – 2022 | Juba, South Sudan

- Applied geospatial data analysis, statistical modeling, and visual data storytelling to national infrastructure and environmental monitoring projects.
- Produced data-driven dashboards and KPI reports in Power BI and Grafana - developing strong visual communication and design critique skills.

## Founder & Digital Skills Trainer | Skills Without Borders (Nonprofit) Mar 2023 – Present | Remote

- Founded nonprofit delivering AI and data science education to 100+ community learners; built AI-powered adaptive learning systems using Python and Scikit-Learn.
- Designed visual and interactive curriculum for data storytelling and AI literacy - applying principles of clear visual communication and instructional design.

## RELEVANT PROJECTS

---

### AI Image Generation Portfolio — Prompt Engineering & Visual Critique

- Extensive hands-on experimentation with Midjourney v6.1 Imagine, Stable Diffusion, and Flux - generating, iterating, and critiquing outputs for composition, lighting, color coherence, and style consistency.
- Developed structured prompt engineering frameworks for image generation: negative prompting, style anchoring, lighting descriptors, and compositional control techniques.
- Maintained a documented image critique practice: analyzing what makes AI-generated visuals succeed or fail against professional photography and design standards.

### ML Mathematical Benchmark Dataset Design — Outlier / Handshake AI (2024–2025)

- Designed and annotated 200+ high-quality benchmark problems for LLM training, applying the same structured annotation quality standards applicable to visual content labeling.
- Evaluated AI-generated outputs for correctness, coherence, and alignment with RLHF feedback standards - directly transferable to image quality evaluation workflows.

### AI-Powered Learning Dashboard — Skills Without Borders (2024)

- Built interactive Power BI dashboard with Python ML (Scikit-Learn) for visual data storytelling - strengthening skills in visual design, layout clarity, and data-driven aesthetics.

## EDUCATION

---

### Data Science & Engineering (In Progress) | ITESO Guadalajara

2023 – 2027

*Concentrations: Data Science, AI/ML, Big Data Analytics, Cloud Computing, Statistical Modeling*

### B.Sc. Applied Mathematics | Mount Kenya University

Graduated 2021

*Specialization: Probability, Statistics, and Data Analysis*

## TECHNICAL SKILLS

---

**Image Generation Tools:** Midjourney v6.1 Imagine, Stable Diffusion, Flux, Midjourney, DALL-E

**Prompt Engineering:** Image prompt structuring, negative prompting, style anchoring, compositional control, iterative refinement

**Visual Critique:** Composition, lighting analysis, color theory, aesthetic coherence, style consistency evaluation

**AI Training:** RLHF/RLAIF, LLM annotation, benchmark design, quality evaluation, structured feedback

**Programming:** Python (NumPy, Pandas, Scikit-Learn, Matplotlib), R, SQL, JavaScript, Bash

**Cloud & Tools:** AWS (Lambda, S3), GCP, Azure, Docker, Git, Power BI, Grafana

**Languages:** English (C2 – Fluent), Arabic (Conversational)
