

TABAN BIEL NGUNAR

AI Visual Specialist | Multimodal AI Trainer | Prompt Engineering (Image & Video)
tabanbiel61@gmail.com • Guadalajara, Mexico (Remote) • github.com/bielng

PROFESSIONAL SUMMARY

AI Trainer and Visual AI Specialist with 4+ years of experience in LLM training, annotation, and RLHF/RLAIF pipelines, including project work with Alignerr. Specialized in AI image and video generation using tools such as Midjourney, Stable Diffusion, Flux, Veo, Kling, Sora, and Seedance.

Strong expertise in prompt engineering for both static and temporal models, with a focus on composition, lighting, style consistency, and motion dynamics. Proven track record of delivering high-quality annotated datasets and structured feedback that improves multimodal model performance. Background in applied mathematics supports rigorous evaluation, pattern recognition, and systematic visual critique.

CORE SKILLS

Visual AI & Prompt Engineering

AI Image & Video Generation (Midjourney, Stable Diffusion, Flux, Veo, Kling, Sora) • Prompt Engineering (image & video) • Cinematic Composition & Framing • Lighting & Color Theory • Style Consistency • Motion Dynamics & Temporal Coherence • Camera Movement & Animation Principles

AI Training & Evaluation

RLHF / RLAIF • Multimodal Output Evaluation • Dataset & Benchmark Design • Annotation & Labeling • Quality Assurance • Feedback Loops • Edge Case Detection

Technical Stack

Python • SQL • R • JavaScript • NumPy • Pandas • Scikit-Learn • AWS • GCP • Azure • Power BI • Git • Video/Streaming Concepts

PROFESSIONAL EXPERIENCE

AI Trainer — Visual & Multimodal Content

Alignerr (Contract) | Oct 2024 – Jan 2025 | Remote

- Evaluated and annotated AI-generated images for quality, prompt adherence, composition, and aesthetic consistency.
- Delivered structured visual feedback on lighting, color balance, and style to support model fine-tuning.
- Designed prompts to identify edge cases and failure modes in image generation systems.
- Contributed to RLHF/RLAIF pipelines by ranking outputs and providing human preference signals.
- Maintained consistent annotation throughput (50+ tasks/week) with high-quality standards.

Automation & AI Trainer

Outlier (Contract) | Feb 2025 – May 2025 | Remote

- Evaluated LLM and multimodal outputs across code, math, and structured tasks.
- Designed 100+ benchmark problems for training datasets.
- Provided detailed feedback, identifying errors in ~30% of outputs.
- Contributed to iterative model improvement through structured RLHF workflows.

ML / Mathematical AI Trainer (Fellowship)

Handshake AI | Jul 2025 – Sept 2025 | Remote

- Created and annotated 200+ benchmark problems for LLM fine-tuning.
- Evaluated outputs for correctness, rigor, and coherence.
- Applied structured evaluation frameworks transferable to visual AI assessment.

Automation & AI Trainer

Mercors (Contract) | Sept 2025 – Dec 2025 | Remote

- Built 30+ AI-powered workflows integrating generative models into operations.
- Automated reporting and content pipelines using Python and cloud tools.
- Deployed solutions on AWS and Azure environments.

Data Specialist

Government of South Sudan | 2021 – 2022

- Conducted geospatial and statistical analysis for infrastructure projects.
- Built dashboards and reports using Power BI and Grafana.
- Strengthened data visualization and storytelling capabilities.

Founder & Digital Skills Trainer

Skills Without Borders (Nonprofit) | Mar 2023 – Present

- Trained 100+ learners in AI and data science fundamentals.
- Built adaptive learning tools using Python and ML models.
- Designed visual-first curriculum for data storytelling and AI literacy.

PROJECTS

AI Image & Video Generation Portfolio

- Extensive work with Midjourney, Stable Diffusion, Veo, Kling, Sora, and Flux.
- Developed advanced prompting frameworks: negative prompting, style anchoring, lighting control, and camera direction.
- Evaluated video outputs for motion quality, temporal consistency, and cinematic storytelling.
- Maintained structured visual critique aligned with professional photography and film standards.

ML Benchmark Dataset Design (Outlier / Handshake AI)

- Designed 200+ high-quality training problems for LLMs.
- Applied consistent annotation standards across reasoning and multimodal tasks.

AI Learning Dashboard (Skills Without Borders)

- Built interactive Power BI dashboard with ML integration.
 - Focused on clarity, usability, and visual storytelling.
-

EDUCATION

B.Sc. Applied Mathematics

Mount Kenya University | 2021

Data Science & Engineering (In Progress)

ITESO Guadalajara | 2023 – 2027

Focus: AI/ML • Big Data • Cloud Computing • Statistical Modeling

TECHNICAL SKILLS

AI Tools:

Midjourney • Stable Diffusion • Flux • DALL·E • Veo • Kling • Sora • Seedance

Prompt Engineering:

Negative prompting • Style anchoring • Lighting control • Camera direction • Temporal coherence • Iterative refinement

Programming:

Python (NumPy, Pandas, Scikit-Learn) • R • SQL • JavaScript • Bash

Cloud & Tools:

AWS • GCP • Azure • Docker • Git • Power BI • Grafana

Languages:

English (Fluent) • Spanish (Fluent)
